

Work Experience

Chord Agency - UI/UX Designer

Feb 2018 - Present , Belgrade

At Chord I worked with the design team on a project called Tempest, where our goal was to restructure the user flows and find suitable ways to manage work shifts within the app. My overall main responsibility was the ux with the occasional ui design.

Currently, I'm working as a Lead Designer on a new project with a goal to build and design a web platform to help organize the entire statistics for a restaurant chain in the south of France.

Evoke - User Interface Designer

Dec 2016 - Aug 2017 , Belgrade

Evoke was a truly unique experience where i had the chance to take my first steps in design. I worked with some of the biggest retail brands in Serbia to help design the ui for their product apps or web sites.
